## EMPLOYMENT IN LARGER PRIVATE FACTORIES - STATE DETAILS

SEPTEMBER, 1962

Information on changes in employment in the larger privately-owned factories, derived from a monthly survey carried out by collaboration between the Department of Labour and National Service and the Bureau of Census and Statistics, is published regularly in the "Monthly Bulletin of Employment Statistics". The attached tables, which should be read in conjunction with Tables 9 to 13 in the August, 1962 Bulletin, provide more detailed information as to employment in the various industrial groups in each State.

Particulars of the principal changes in the level of employment between August and September, 1962 in each of the five mainland States are shown for factories engaged in the manufacture of food, drink and tobacco in Table 1 and for other factories in Table 2. In these tables, although employment variations for all industries in each industrial group have been included in the group totals, minor variations in individual industries have not been shown separately. The industry figures shown cannot, therefore, be added across to give totals for the five mainland States.

Table 3 gives details of employment by industrial groups in each of the five mainland States, and a finer division by industry sub-groups is shown in Table 4.

For Tasmania, the principal changes in the level of employment between August and September, 1962 are shown in Table 5. Minor variations in individual industries have not been shown separately. Employment in the main industrial groups is shown in Table 6. Owing to the risk of disclosure of individual factory particulars, these figures cannot be made available in the same detail as those for other States.

Total employment in all factories surveyed increased by 2,234 (+1,474 males, +760 females) between August and September, 1962. Employment increased in Victoria (+1,498), South Australia (+670), New South Wales (+536), and Western Australia (+54), but decreased in Queensland (-378) and Tasmania (-146). The employment level in September, 1962 was 40,462 higher than in September, 1961.
